

The **American Juvenile Practice™** is specifically designed for the needs of attorneys dealing with criminal matters involving juveniles. This product helps you provide the best possible law enforcement services to your community.

Modules are provided to give you the power you need to handle your kind of cases today, including:

- Juvenile Delinquency** Felonies and Misdemeanors are classified easily through lookup lists you define—Drugs, Prostitution, Homicide and Burglary are typical offenses handled here. The primary players, a brief description of the case and key dates are shown on a cover screen with tabs to go to pertinent detail such as charges, documents, notes, courts, full party list, incident details and more.
- Adult Offenses** Adult cases can also be tracked in this system.
- Child Abuse** Special handling for child abuse and neglect matters helps track these matters through the Family or Administrative courts. Full event management lets you see all the hearings and progress reports as these cases go on.
- Truancy** Instances of truancy are tracked by student and by school.
- Teen Court** Tracks a juvenile's experience when they are adjudicated by a teen court. This inventive procedure exposes young people to the justice system while committing a juvenile to the judgment of their peers. Volunteer participants are tracked by the time they spend in the process and the roles they play in the court.
- Clinical Tests** Any clinical test done on any party to the case is an essential element of evidence. This module tracks critical detail, such as the type of test, when it was done, who performed the test, who reported on it and what were the results. This includes blood tests, drug tests, DNA, HIV, ballistics and any other test you include.
- Gangs** This module tracks gang activity and membership and is fully integrated into the overall product. It can show how gang-related criminal activity is or is not escalating, and let you focus on those top 50 people in your community. If you have a Gang Unit, this can be very helpful to them.
- Plea Bargaining** Track offers, deadlines and responses, see historical patterns of individual defense attorneys and show all outstanding offers by in-house attorney and by defense attorney.
- Diversion Programs** This new trend offers substantial flexibility in sentencing that can help move cases. A person can be sentenced to more than one diversion program. All available programs can be reviewed and program history of a defendant is a keystroke away.

If you have a special need, be sure to ask about other available modules including Grand Jury, Bad Check Collection, Civil Matters, Freedom of Information Act Request Handling, Consumer, Medicaid Fraud, Legislative Review, Police Data Import and more.

Built on a Solid Base

The Government Suite products have all the strong qualities associated with LegalEdge Software™

- Unlimited Cases
- Unlimited Parties per Case
- Unlimited Issues per Party per case
- Free-flowing cross referencing
- User-defined tables
- Word processing interface to merge YOUR forms and letters with database information from Subpoenas to correspondence to file folder labels, this part of your job was never easier.
